***Allowable Subject Matter***

Claims 1,3-5,7-13,15-17 and 19-25 are allowed.

The following is an examiner's statement of reasons for allowance: The closest prior art known to the Examiner is listed on the PTO 892 forms of record. With respect to claims 1 and 13, the cited prior art does not anticipate or make obvious, *inter alia*, performing an annealing process to convert the concave top surface of the copper wiring to a convex top surface so that side edges of the copper wiring that engage the copper anti-diffusion conductive film are disposed below a top surface of the interlayer insulating film, wherein the annealing process is performed using an inert gas of N<sub>2</sub>, Ar, H<sub>2</sub> or He or a mixture thereof] or in a vacuum state at a temperature in the range of 100°C to 700°C in a thermal annealing process and forming a copper anti-diffusion insulating film on the entire structure including the convex top surface of the copper wiring having the convex shape, thereby flattening a surface of the entire structure. With respect to claim 13, sequentially forming an interlayer insulating film and an anti-polishing layer on a substrate and forming a selective copper anti-diffusion conductive film on the convex-top surface of the copper wiring having the convex shape.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
